- (S) Human monocyte growth factor.
- (f) A novel growth factor, human monocyte growth factor, stimulating proliferation and differentiation of human peripheral blood monocyte. The factor is a protein produced from human lung cancer cell line and having M.W. of about 21,000. The activity of the factor is heat-sensitive, trypsin-sensitive, chymotrypsin-sensitive, and destroyed by 2-mercaptoethanol. A purification process of the factor is also provided.

The state of the s

which is first the product of the plant of the control of the cont
